

THE SDA SLICE

Here are some photos of the activities during this week's After School Program. From left, our students are doing an art class with Ms. Bailey. The middle picture shows the students doing an experiment of mixing colors during the Applied Science class with Mr. Mercado. And the right picture shows our students playing snowball fight with Mr. G.

AFTER SCHOOL CLASSES

Bible Verse

"For the LORD your God is with you wherever you go." (Joshua 1:9)

Grades 5 & 6 experimenting on factors affecting solubility of substance.

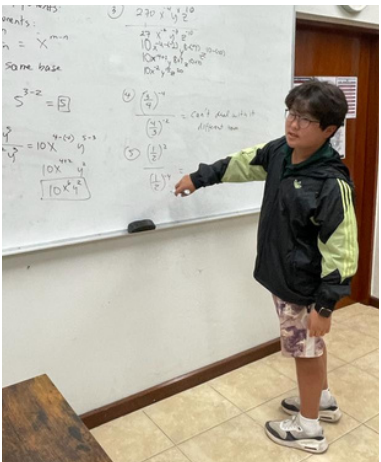

The article provides a guide to uncovering soil crystals using the acid test method.

The Kindergarten students are attentively listening to their story of the week entitled, "Sam and the Lucky Money".

Our 3rd & 4th Grade students are experiencing the sacrifice of lambs for sins in the Old Testament Days.

One of the Temporary students in 7th & 8th Grade is solving, multiplying exponents in Elementary Algebra.

Our 5th & 6th are cooking Dalgona Candy, it's a Korean traditional candy made from baking soda and sugar.

Our students and staff shared their testimonies about things they like during chapel period.

This week our Pre-Kinder students learned about heat. They did two kinds of experiments: the first one from the top is all about using the best material as insulator to keep the temperature of the hot water and the other one from the bottom is about how heat changes things when applied.

Half of the students in the Preschool class are playing blocks while waiting for their classmates to finish painting their bible story of this week. Playing blocks with their peers will help them learn important social skills such as sharing, taking turns, and working together.

Every Friday our Toddlers are playing different kinds of manipulatives to help them develop their fine motor skills, hand-eye coordination, problem-solving abilities, and creativity.

REMINDER:

Kindly collect your student at the front gate during the dismissal.
